

# ACA RoQ™

## Roll Hardness Profiler

New ACA RoQ analysis platform  
that revolutionises  
profile test practices

# State-of-the-art Mobile Technology

## HARDNESS APPLICATION |

Roll hardness is a key parameter defining a good roll.

Identify problematic rolls easily by mobile ACA RoQ hardness profiler and avoid runnability issues.

Embedded touch screen, Wi-Fi and built-in barcode reader allow instant hardness profile displayed and versatile data handling possibilities as well.

ACA RoQ analysis is not just a measure of roll quality, but also a great web quality tool.

Caliper variations are far too small to be picked up by online scanners or test labs. Hardness profile is an excellent indicator of paper or film material being level enough to be wound up.

## SPECIFICATIONS |

Display	4,3" touch screen
Wireless Connectivity	WLAN
Wired connection type	USB
Batteries	2 x Li-ion 2200 mAh
Charging	From USB port
Dimensions	180 x 80 x 122 mm
Weight	1,4 kg
Barcode Reader	Built-in camera
Max. Profile Resolution	1 mm
