

## F-2000/H Moisture Meter for Hops

Delmhorst hops moisture meter F-2000H is an easy to use tool for accurate determination of the moisture content in hops.

Freshly picked hops contain a high percentage of water. To avoid that this water in the cones will lead to mold and mildew, it is important to know the moisture content during the drying processes. To get the best dried hops, identifying when the hops is at the right moisture content is important. For this application, F-2000H moisture meter for hops is the portable instrument that will guide you to the right quality.

### F-2000 – Features and benefits

- Bright, clear digital display
- Averages up to 100 accumulated readings
- Displays average and highest of accumulated readings
- Moisture Range: 7%-23% on hops
- Built-in calibration check
- Audible, adjustable alarm alerts you when a pre-selected MC has been reached
- Size: 20x80x4cm (8x3x1 5/8")
- Weight: 285gr. (10 oz)
- Rugged construction ensures years of reliable use
- Optional sturdy plastic carrying case
- 9V battery

### Optional accessory:

### MCS-44 – Calibration verification block

This moisture content standard is great for verifying that your hops moisture meter is in calibration.

With two electrical resistance values (8% and 10%) to test your meter against, you can be sure that your readings will stand up to the strictest standards of accuracy.

The MCS-44 is also available with a letter of certification traceable to NIST.

## F-2000/H Moisture Meter for Hops

**Available Electrodes** for a variety of applications

**1235 (25 cm)**

Attaches directly to the connector on top of the meter.

**Benefits**

Pen electrode used for testing standard bales.

**Also available:**

**1235/18** (45 cm)

**830-5 (30 cm)**

Pen electrode specially for hops. (Requires H-4 Handle)

**Benefits**

For testing standard and high density hop bales.

**Also available:**

**830-2** (25 cm)

**830-3** (45 cm)

**830-4** (90 cm)

**H-4**

Handle for electrodes 830-5, 831 and 832

**Benefits**

Useful for large or high density bales.

**831**

Short needle electrode (Requires H-4 Handle)

**Benefits**

Multi-pin probe, for testing MC of loose material
